

JOB POSTING

Institution: Valdosta State University
Position Title: Project Engineer/Architect
Department: Physical Plant & Facilities Planning
Location: Valdosta, Georgia

Valdosta State University is accepting applications for a Project Engineer/Architect within the Facilities Planning Department to oversee design and construction of repair, renovation and new construction contracts. Position is responsible for the coordination and management of engineering, purchasing and construction activities throughout the life of a combination of small, medium and large projects. Projects can include renovation, major repair & replacement, building additions and new buildings. Apply strong project management skills, knowledge of engineering and construction practices, applicable codes and standards, organization, teamwork and communication to implement successful projects. Prime responsibility for maintaining satisfied customers and meeting project goals for cost, schedule and functionality.

Required qualifications include bachelor's degree in construction management, architecture, engineering or related field, at least three (3) years of increasingly responsible work experience in the administration of construction projects; working knowledge of graphic presentation, specification writing, architectural, mechanical and electrical detailing, construction management and scheduling; contract administration as applied to construction & remodeling of buildings; ability to plan & organize the phasing of a large construction project; ability to coordinate and integrate mechanical and electrical systems into the architectural & structural planning of buildings; ability to communicate effectively, both verbally and in writing.

Desired qualifications include licensed as an Architect, Professional Engineer or ability to obtain license; Working knowledge of codes and ADA guidelines as applied to construction & remodeling of buildings; experience with or certification in Leadership in Energy and Environmental Design project execution; experience with preventative maintenance programs.

Wage rate: Commensurate with qualifications.

Screening begins immediately and continues until filled. Contact Catherine Roark at (229) 333-5875 to submit application and resume.
